

CAREER SUMMARY

Entry-Level Data Analyst with hands-on experience in SQL, Python, Tableau, and Excel. Skilled in data cleaning, exploratory data analysis (EDA), KPI reporting, and dashboard development to support business decision-making. Experience working in Agile teams and building end-to-end analytics projects involving revenue analysis, customer segmentation, and performance tracking. Strong analytical foundation with a Master’s in Data Analytics.

TECHNICAL SKILLS

Programming: Python (Pandas, NumPy), SQL, R
Databases: PostgreSQL, MySQL, SQLite, BigQuery
Data Analysis: Data Cleaning, EDA, KPI Tracking, Cohort Analysis, Customer Segmentation
Visualization: Tableau, Power BI, Excel (PivotTables, Power Query), Looker Studio
Tools: Git, VS Code, Databricks
Concepts: Revenue Analysis, Profit Margin, AOV, CLV, Data Validation

PROFESSIONAL EXPERIENCE

DATA ANALYST | Capstone, Client: TraCCC | Fairfax, VA Aug 2025 – Dec 2025

- Served as Product Owner in a 5-member Agile team, translating research objectives into structured analytics tasks and sprint deliverables.
- Cleaned and transformed large-scale datasets (2018–2024) using Python for structured analysis.
- Conducted exploratory and statistical analysis to identify patterns in incidents, casualties, and geographic distribution.
- Developed data visualizations using Matplotlib and Seaborn to communicate findings.
- Contributed to comparative analysis supporting research-based policy insights.

DATA ANALYST | Labfox.Studio | Hyderabad, India May 2022 – Dec 2023

- Assisted in defining business KPIs and supporting data-driven reporting initiatives.
- Wrote SQL queries to extract and analyze structured datasets for sales and operational reporting.
- Built interactive Tableau dashboards to monitor performance trends and customer activity.
- Cleaned and prepared datasets using Python (pandas), handling missing values, duplicates, and formatting inconsistencies.
- Automated recurring reports using Excel and Power Query, improving reporting efficiency and consistency.
- Performed basic data validation checks to ensure accuracy across reporting outputs.

PROJECTS

Customer Behavior & Revenue Optimization Analysis – E-commerce Platform

- Analyzed 100K+ transaction records to identify revenue drivers and customer purchasing patterns.
- Performed RFM segmentation to classify high-value and at-risk customers.
- Built an interactive Power BI dashboard tracking Conversion Rate, AOV, and Customer Lifetime Value (CLV).
- Conducted cohort and seasonal trend analysis to support retention and inventory planning decisions.

Retail Sales Performance & Demand Forecasting Analysis

- Built an end-to-end analytics pipeline to evaluate revenue, profit margins, and regional performance.
- Engineered KPIs in SQL using CTEs and window functions (LAG, GROUP BY).
- Performed customer segmentation and regional trend analysis in Python.
- Developed a Tableau dashboard (Executive Overview, Regional, Customer, Product Performance).

EDUCATION

MASTER’S DEGREE | Data Analytics | George Mason University Jan 2024 – Dec 2025

Coursework: Statistics, SQL & Database Systems, Data Wrangling with Python, Data Visualization, Data Quality & Governance.

BACHELOR’S DEGREE | Computer Science | Vignana Bharathi Institute of Technology Aug 2019 – June 2023

Coursework: Data Structures & Algorithms, Database Management Systems (SQL), Operating Systems, Computer Networks, Probability & Statistics, Object-Oriented Programming, Software Engineering, Web Technologies.

CERTIFICATION

Cisco – Data Analytics Essentials Issued Feb 2026
